Bird Pro

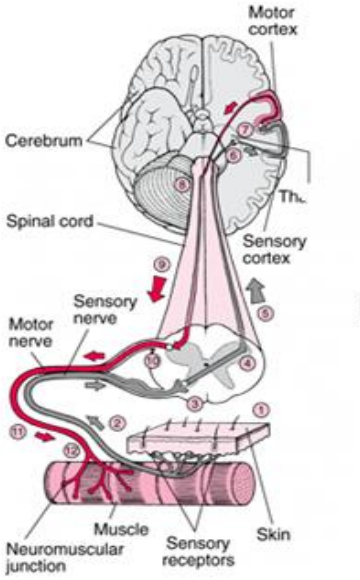

- **PRODUCT** Bird Pro bird repellent gel
- **FORMAT** 250 g soft tube with precision nozzle
- **APPLICATION** 15-20 g per disposable tray

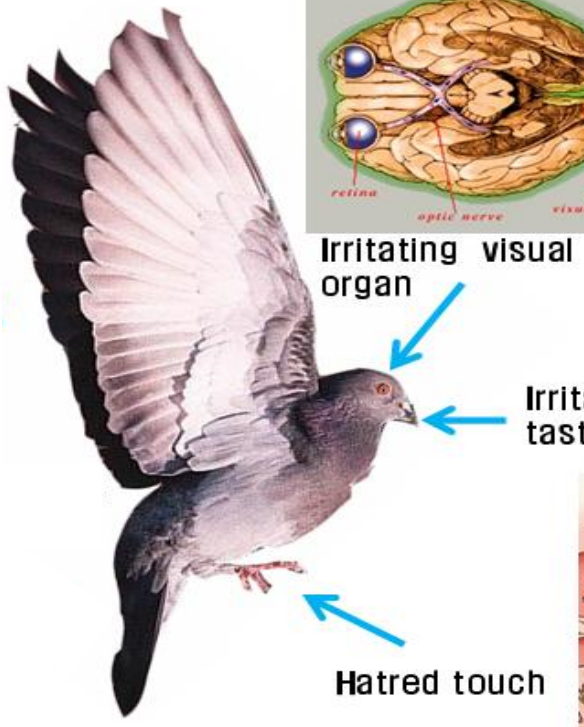

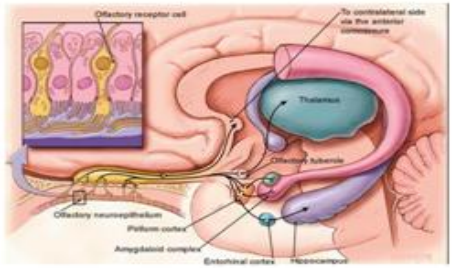

How does Bird Pro work?

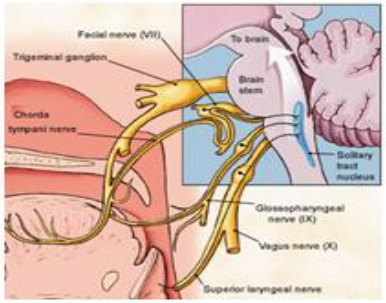

- Bird Pro is designed to discourage birds through multiple sensory cues, including visual, tactile, olfactory, and taste-related effects.
- Using several cues may help limit habituation compared with a single-signal deterrent.

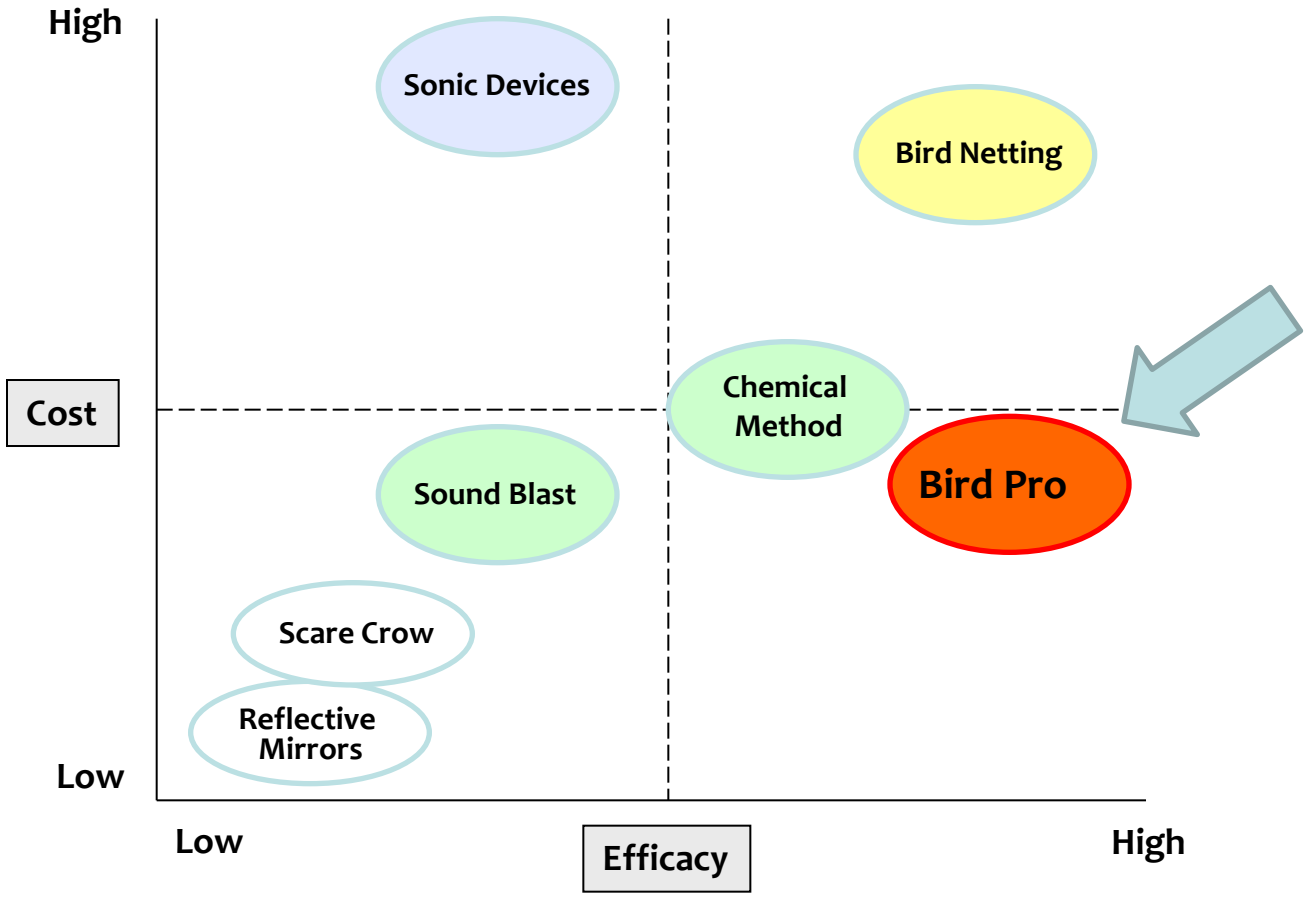

Bird control methods

: Causes high level of pollution and environmental distress

: Cost is High and not an efficient way to repel birds

Bird control methods

Bird control methods

Method	Impacting organ	Effect	Cost
Explosive sound devices	Auditory	Only effective at the initial stage Causing noise pollution problem	Middle
Supersonic waves	Auditory	Only effective at the initial stage Causing noise pollution problem	High
Reflecting mirror(tape)	Visual	Almost not effective	Low
Visual scare devices	Visual	Almost not effective	Low
Chemical products	Olfactory	Effective but adaptable and not stable Causing serious environmental problem	Low
Net facilities	Physical	Very effective but too expensive	High
Bird Pro	**Visual/Taste Olfactory/Tactile**	**Multi-sensory gel deterrent; use depends on site conditions**	**Middle**

Features	-Gel for use in secured trays or on prepared surfaces where trays cannot be secured.	- Non-toxic, sticky - Simple installation - No specific maintenance after application - Low visibility from distant.	- Building Immune to changes of temperature - Non-toxic - Bird can get stuck causing death - Difficult to remove once applied.	- Non fatal to birds, just keeps them away - All building facilities or structures are applicable.
Installations Method	Dispense 15-20 g per tray. Secure trays 10-50 cm apart and inspect regularly.	- Put gel widely on damaged surfaces. (One pack may cover linear 40 meters (135ft) strip)	- clean and dry the surface. - apply in stripe ¼" thick and run in a worm-like path.	- Clean and dry the surface. - Apply in stripe and run in linear from - A set covers 40m (135ft) in length.
Efficacy period	Inspect and replace as needed	Up to 1 year	Up to 2 years	Up to 1 year

Directions for use

USE

Bird Pro is a gel designed to deter pigeons, magpies, sparrows, crows, and other unwanted birds from ledges, beams, signs, roof edges, and similar structures. Use secured disposable trays. Apply directly to a prepared surface only where trays cannot be secured. Keep the gel away from feeders and areas used by non-target birds.

SURFACE PREPARATION

Wear waterproof gloves and suitable respiratory protection when removing nests or droppings. Wet droppings first to limit dust. Remove nests and debris, then clean and dry the surface. Choose a well-drained location. Seal porous wood, stone, or concrete before direct application. For easier removal, apply waterproof tape first and apply the gel to the tape.

APPLICATION CONDITIONS

Do not apply in rain or below freezing. Application is easier at 15-35 degrees C. Follow the approved label for the market where the product is used.

APPLICATION DIRECTIONS - SOFT TUBE

Products

Bird Pro

Disposable trays

Adhesive Silicon

1. Put on waterproof gloves and suitable respiratory protection when cleaning areas with bird droppings.
2. Prepare the surface as described on the previous slide. Allow it to dry.
3. Open the soft tube and dispense 15-20 g of gel into each disposable tray.
4. Secure the trays to the prepared surface with suitable silicone adhesive, 10-50 cm apart according to bird activity. Inspect regularly and replace damaged or depleted trays.

Application steps

4. Open the Bird Pro soft tube and remove the nozzle cap.

Use the integrated precision nozzle.

-Place the gel in the center of the tray. Secure the tray to the prepared surface.

5. Dispense 15-20 g of Bird Pro into each disposable tray.

-Use 15-20 g of gel per tray, according to the approved label.

6. Inspect placements regularly; replace damaged or depleted trays.

CLEAN-UP

Wear waterproof gloves and suitable respiratory protection. Remove used trays. Peel off tape or scrape gel from treated surfaces, then wash residue and equipment with soap and water without contaminating water sources.

STORAGE AND DISPOSAL

Store the closed tube in a cool, dry place away from children, pets, food, feed, heat, and sunlight. Do not contaminate water, food, or feed during storage, clean-up, or disposal. Never pour unused gel down any drain. Do not reuse the tube. Recycle empty tubes if accepted locally; otherwise discard them under local rules. Dispose of unused gel, used trays, and partly filled tubes through an approved waste facility where required.

PRECAUTIONS

Avoid contact with skin, eyes, and clothing. Wash after use. Consult the approved Bird Pro label and safety data sheet for full first-aid and handling instructions.
